## **inuZO** *Unique in the World*

**inuZO** detergent is the first and only smart detergent in the world, designed and manufactured with its unique characteristics by Iranian elites and experts. This product is the result of years of experience, knowledge and effort of a group of scientists from this country, which, with God's help, will be included in the main basket of household consumption and industrial use soon

This detergent, which simultaneously performs washing, cleaning, descaling and disinfection cleaning is the best ever made cleaner in the world

This product, with an acid-like structure and a pH under 1, is skin-safe and does not cause any harm to the body. Perhaps it is necessary to know that the pH of sulfuric acid, one of the most dangerous acids, is one. Therefore, according to the tests conducted and the approvals obtained, **inuZO** is classified as a completely non-toxic substance

All detergents in the world contain one of the three substances: alcohol, chlorine or salt. **inuZO** contains neither alcohol, chlorine nor salt. Therefore, it does not produce any toxic fumes. Inuzo is lung-safe and poses no potential risk to children

We all know that acids are the enemy of metal. There is no acid cleaner in the world that is made for metal. While **inuZO**'s All-purpose cleaner product is specifically designed for metal and steel surfaces, it not only does not damage them, but also makes steel and other metals clean and shiny

The **inuZO** family includes products, some of which are being offered for the first time in the world. This brand, which has obtained all the necessary health and production licenses, is going to leave the detergent markets a long way behind in Iran and the world

We are proud to have produced products that are completely eco-friendly and skin-safe, while being effective and of excellent quality. Products that do not have the increasing skin and lung damage compared to other detergents and, in short, it will hopefully be the future horizon of detergents in Iran and the world

## Tips for using **inuZO** Products

The methods of using **inuZO** are listed on the back of the bottle of the entire **inuZO** family. But here we will mention some specific uses for washing various items and list some brief but effective recommendations

### ● Descaling of regular and electric kettles

Spray the all-purpose **inuZO** on the inside surfaces of the kettle in a dry state. Let the inside surface of the kettle be completely soaked with **inuZO** and the liquid spread at the bottom of the kettle. Wait for ten minutes and then pour a little water on the contents of the kettle and put it on the heat and let it boil on low heat for fifteen minutes. If the amount of sediment in your kettle is very high. In this case, most of the sediment on the kettle has been removed. Wash the kettle thoroughly with a regular sponge and repeat this process until all the sediment in your kettle is gone and it becomes as new as the first day

### ● Be sure to fill it once with water and boil it on high heat. This will remove any detergent residue from the inside of the kettle

Note that **inuZO**'s effectiveness is when sprayed on dry surfaces. So, if faucet or toilet is wet, wait until it dries and then use Inuzo

### ● Each **inuZO** spray has a cap on its outlet that you can rotate. In this case, it will be in two lock positions and will have two low-pressure and high-pressure spray modes. Note that **inuZO**'s effectiveness will be higher in the low-pressure spray mode of the spray cap

### ● **inuZO** is the only acid in the world that does not have destructive effects on metals. However, in any case, leaving **inuZO** on metal or non-metal surfaces for long hours can be harmful. So be sure to rinse the surfaces you use it on thoroughly with water after washing

## All-purpose **inuZO** (All in One)

All-purpose **inuZO** is the main product of the Inuzo family. This product is the world's first all-purpose descaler

**inuZO** is smart. It recognizes its underlying surface. It affects the dirt and pollution and is skin-safe. This is the miracle of the Iranian elite

All-purpose **inuZO** is designed for use on steel and metal surfaces, all types of faucets, sinks, gas, hoods, dishes with old dirt and rust, kettle, samovars, head showers, aluminum doors, stains, carpets, tiles and ceramics, all types of leather, plastic, chairs, non-limestones, engine washing from oil and grease contaminants, stains on fabrics and clothing, etc

**inuZO** is designed to be skin-safe and eco-friendly and does not produce toxic fumes

**inuZO** is the only acidic detergent that can have effect on metal surfaces and in addition, is 100% disinfecting

## Hospital Special **inuZO**

Hospital Special **inuZO** is designed specifically for clinical spaces. The disinfecting effects of this product are unique, and in confirmed tests, this product can .reduce the number of living microorganisms on surfaces to zero after use

**inuZO** has extraordinary cleaning power on blood stains and other old stains remaining on surfaces. It can also be used simultaneously in different parts of the bathroom, including faucets and floor and wall ceramics, or different components of the patient's room, including the floor, wall, or room equipment. Something .that is not available in other detergents

Hospital Special **inuZO** is completely skin-safe and eco-friendly. It does not have toxic fumes, and this property is a key feature for hospital environments. Of course, disinfection of the environment is an integral part of the working space of hospital environments. But most disinfectants contain alcohol or chlorine, which .have a detrimental effect on the lungs of staff and patients

**inuZO** contains neither alcohol nor chlorine, but it performs cleaning and disinfection operations at the same time and will not have any detrimental effect on .the lungs of patients or staff

**inuZO** is prepared and produced for use on all hospital levels, clinics, pharmacies, patient rooms, ambulances, patient-specific equipment, intensive care, quarantine wards, hospital devices, etc
